## EDCO *Diamond* BLADES

### **BUILT FOR WORK. NOT HYPE.**

When the job starts, your blades should work as hard as your crew. EDCO Diamond Blades are built for real performance. Durable. Reliable. Ready to cut.

### **WHAT MAKES EDCO BLADES DIFFERENT**

#### **LASER-WELDED SEGMENTS**

- Strong bonds mean dependable performance and long blade life on the job.

#### **APPLICATION-SPECIFIC DESIGN**

- Gullet shapes and segment lengths are matched to the material for better airflow, cooler cuts, and faster performance.

#### **UNIVERSAL COMPATIBILITY**

- Works with most popular saws — no need for specialized equipment.

### **BLADES BUILT FOR THE JOB**

#### **CONCRETE & GENERAL USE BLADES**

- Coarse, properly graded diamond grit for aggressive cutting
- Engineered bonds for consistent wear and reliable results

#### **ASPHALT BLADES**

- U-shaped gullets = improved airflow & heat control
- Shorter segments = faster cutting, less wear

#### **TILE & GLASS BLADES**

- 7" Zenesis Tile Blade uses nano diamond cluster technology for faster, cleaner cuts
- 7" & 10" Continuous Rim Blades cut glass with water — no other blade required

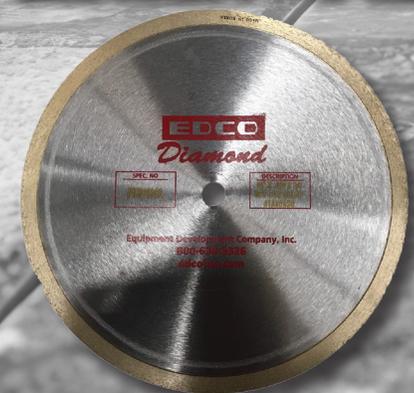

### **WHY CHOOSE EDCO BLADES -**

- Built tough for daily use
- No gimmicks or hype, just solid performance
- Works with the tools you already trust
- Backed by EDCO quality and support

**EDCO *Diamond* Blades** —  
*Work harder. Last longer.*
